HELPS PEOPLE IN MANUFACTURING CONTROL THEIR DESTINY EVERY DAY

Biography

Applications Engineer, MASTER

Craig Jung

Craig began working in the machining industry in 1982. Craig worked in various machine shops as an operator, CNC programmer and shop foreman. Craig has programmed and ran various types of CNC equipment ranging from CNC lathes; mills, and grinders. He also has a strong background in automation and project management.

Currently, he works in the Applications department for Hartwig Inc. and is based out of the corporate office in St. Louis. Craig has been with Hartwig since 1998.

His first 3 years at Hartwig, Inc. were spent as the CNC trainer, training our customers on new machine installs and teaching all of the lathe and mill programming classes. Now he is one of the main engineers working on turnkey installations and project management.
