HELPS PEOPLE IN MANUFACTURING CONTROL THEIR DESTINY EVERY DAY

Biography

Applications Engineer

Howard Wiggins

Howard Wiggins is the Applications Engineer for Hartwig, Inc. based out of Broken Arrow, Oklahoma based out of the Broken Arrow, OK office. He has been with Hartwig, Inc. since 2004.

Howard began working in the machining industry in 1992 running Okuma lathes. Before his career at Hartwig, Inc. he worked in various machine shops as an operator, and as a CNC programmer. He has programmed and run various types of CNC equipment ranging from CNC lathes, mills, wire EDM, die sink EDM, and waterjets. He has worked in the sheet metal industry programming CNC punch press machines and setting up CNC brakes for forming. Howard received an AS in Drafting and Design and a BS in Industrial Technology.

Since joining Hartwig in 2004 his primary job is applications but also services machines when needed. Howard enjoys helping customers succeed and training them in new technologies. He has done several turnkeys for customers including robotics applications.
